Description of Datasets found on the Wiley web site for "Econometric Analysis of Panel Data," by Badi H. Baltagi.

1. GRUNFELD.FIL
   Source: Grunfeld (1958)
   Description: Panel Data, 10 U.S. firms over 20 years, 1935-1954.
   Variables:
   (1) FN = Firm Number.
   (2) YR = Year.
   (3) I = Annual real gross investment.
   (4) F = Real value of the firm (shares outstanding).
   (5) C = Real value of the capital stock.

2. GASOLINE.DAT
   Source: Baltagi and Griffin (1983).
   Description: Panel Data, 18 OECD countries over 19 years, 1960-1978.
   Variables:
   (1) CO = Country.
   (2) YR = Year.
   (3) LN(Gas/Car): The logarithm of motor gasoline consumption per auto.
   (4) LN(Y/N): The logarithm of real per-capita income.
   (5) LN(Pmg/Pgdp): The logarithm of real motor gasoline price.
   (6) LN(Car/N): The logarithm of the stock of cars per-capita.

3. PRODUC.PRN
   Source: Munnell (1990), see also Baltagi and Pinnoi (1995).
   Description: Panel Data, 48 states over 17 years, 1970-1986.
   Variables:
   (1) STATE
   (2) St_Abb = State abbreviation.
   (3) YR = Year.
   (4) P_CAP = Private capital stock.
   (5) HWY = Highway and streets.
   (6) Water = Water and sewer facilities.
   (7) Util = Other public buildings and structures.
   (8) PC_Tot = Public capital.
   (9) GSP = Gross state products.
   (10) EMP = Labor input measured by the employment in non-agricultural payrolls.
   (11) UNEMP = State unemployment rate.

4. WAGE.DAT
   Source: The Panel Study of Income Dynamics, taken from Cornwell and Rupert (1988).
   Description: Panel Data, 595 individuals over 7 years, 1976-1982.
   Variables:
   (1) EXP = Years of full-time work experience.
   (2) WKS = Weeks worked.
   (3) OCC = (OCC=1, if the individual is in a blue-collar occupation).
   (4) IND = (IND=1, if the individual works in a manufacturing industry).
   (5) SOUTH = (SOUTH=1, if the individual resides in the South).
   (6) SMSA = (SMSA=1, if the individual resides in a standard metropolitan

statistical area).
(7) MS = (MS=1, if the individual is married).
(8) FEM = (FEM=1, if the individual is female).
(9) UNION = (UNION=1, if the individual's wage is set by a union contract).
(10) ED = Years of education.
(11) BLK = (BLK=1, if the individual is black).
(12) LWAGE = Logarithm of wage.

5. CIGAR.TXT

Source: Baltagi and Levin (1992) and Baltagi, Griffin and Xiong (2000).
Description: Panel Data, 46 U.S. States over the period 1963-1992.
Variables:
(1) STATE = State abbreviation.
(2) YR = YEAR.
(3) Price per pack of cigarettes.
(4) Population.
(5) Population above the age of 16.
(6) CPI = Consumer price index with (1983=100).
(7) NDI = Per capita disposable income.
(8) C = Cigarette sales in packs per capita.
(9) PIMIN = Minimum price in adjoining states per pack of cigarettes.

6. HEDONIC.xls

Source: Harrison and Rubinfeld (1978). See also Belsley, Kuh and Welsch (1980).
Description: Cross-Section, 506 Census tracts in the Boston area in 1970.
Variables:
(1) MV = Medium value of owner-occupied homes.
(2) CRIM = Crime rate.
(3) ZN = Proportion of 25,000 square feet residential lots.
(4) INDUS = Proportion of nonretail business acres.
(5) CHAS = Represents the dummy variable which is 1 if the tract bounds the Charles River.
(6) NOX = Annual average nitrogen oxide concentration in parts per hundred million.
(7) RM = Average number of rooms.
(8) AGE = Proportion of owner units built prior to 1940.
(9) DIS = Weighted distances to five employment centers in the Boston area.
(10) RAD = Index of accessibility to radial highways.
(11) TAX = Full value property tax rate ($/$10,000)
(12) PTRATIO = Pupil / teacher ratio.
(13) B = Proportion of blacks in the population.
(14) LSTAT = Proportion of population that is lower status.
(15) TOWNID = Town identifier.
