Tipo de Cambio Real; ¿Cómo Definirlo?

PARAMETER	DESC
rexrx(sim)	real exchange rate
rexrxp(sim)	real exchange rate
dpix(sim)	index for domestic producer prices (PD-based)
dpixp(sim)	index for domestic producer prices (PD-based)
dwts(c)	domestic sales price weights

Tipo de Cambio Real; ¿Cómo Definirlo? – cont.

```
dwts(c) = ( SUM(a, SAM(a,c)) - SAM(c,'row') ) /  
           ( SUM(cp, SUM(a, SAM(a,cp)) - SAM(cp,'row')) );
```

```
dpix('%1') = SUM(c, PD.L(c) * dwts(c));
```

```
rexrx('%1') = EXR.L/DPIX('%1');
```

SIMSAM

Otros Reportes

- Finalmente, una vez definido el reporte SIMSAM, es fácil agregar otros reportes; por ejemplo,
 - balanza de pagos,
 - ingresos y gastos del gobierno,
 - etc.
